Prichche, *obs.* form of Patch *sb.* and *v.*

Price (prois), *sb.* Main forms: 2–5 pris, 4–7 prise, 5– prise: others see below. [ME. a. OF. *pris* (mod.F. *prix*) :—earlier **prizis* (= Pr. *preis*, Sp. *precio*, It. *prezzo*) :—late L. *pretium*, orig. *pretium* 'price, value, wages, reward'; in OF. also 'honour, praise, prize'. The long *i* of ME. *pris* was variously represented by *ii*, *ij*, *y*, *yi*, *y*, *ie*, and indicated later by final *e*, *prise*; but to avoid the *z* sound of *z* between two vowels (cf. *rise*, *vise*), *prise* was changed to *price* (as in *thin*, *mice*, *twice*). The *pr.* had, sometimes at least, the *z* sound (cf. *house*, *houses*) and was commonly written *prises*, *prizes* in 16–17th c.; but though (*prei-z*) is still common dialectally and with individuals, the standard pronunciation is now (*prai-s*) after the sing., *prizes* being thus distinguished from *prices*. ME. *pris* had all the OF. senses 'price, value, honour, prize, praise'; it first threw off the last of these, for which in 15th c. the *sb. praise*, Praise, was formed from the cognate *vb. prisien*, Praise. During the last 500 years it has also thrown off the fourth sense, for which the by-form Prize has been established. The sense 'honour' is obsolete, that of worth or value ('a pearl of great price') obs. or arch., so that *price* now retains only the primitive sense of OF. *pris* and L. *pretium*. See also Praise *sb.* and *v.*, Prize *sb.* and *v.*]

Prick (prik), *v.* Forms: see A. below. [Late OE. *prician*, pa. t. **pricede*, ME, *pricie(n, pricte*, pa. t. *pricede*: cognate with OE. *prica*, PRICK *sb.* Cf. Icel. *prika* (1304) to stab slightly, Norw. *prika* (*prekta*); also MLG., LG., EFris., Du. *prikken*, MDu. *prikken, pricken*, WFris. *prykje*, Wang. *prikje*, NFris. *pricken*; also Da. *prikke*, Sw. *pricka*, Norw. *prikka* (from LG.), all pointing to WGer. doublet forms **prikkjan* and **prikkōjan*. Cf. also PATTEN *v.*, representing an OE. **pricc(e)an* (found in *ape(r)cean*)—WGer. **prikjan*.

Like the sb., the verb appears to belong peculiarly to the Low-German domain, being evidenced first in OE. and next to MLG.: it was prob. in OLG., OFris., and ODu. From ME. it seems to have passed into Scandinavian. Perh. from an onomatopoetic root *prik*, representing the action and sound of piercing abruptly stopped. In the form *prickle*, *prickle*, the *kl*, *ck* was prob. merely graphic, to show the short vowel. The form *prickle* appears to be a northern development of *pricken*; but the 13–15th c. *prikle*, *prykle* point to an OE. **pricel*, **prikel*. *Prickle* is also found in OE. *pricelan*, ME. *prikle*, *prykle* as parallel form of *pricken*, *prikken*.

2. *Eccl.* An archbishop, or formerly sometimes a bishop, holding the first place among the bishops of a province; also applied to a patriarch or exarch of the Eastern Church.

In England both the archbishops are primates, the arch-bishop of Canterbury being entitled 'primate of all England', and the archbishop of York 'primate of England'; so, the archbishop of Armagh is 'primate of all Ireland'; the arch-bishops of Dublin, 'primate of Ireland'; before the Reformation, the archbishop of St. Andrews was from 1487-1547 pri-mate of Scotland; but on the continent, there are primates having archbishops under them; in France there were formerly three primates, the archbishops of Lyons, Bourges, and Rouen.

I. In the ecclesiastical and connected senses.

1. One of the Day Hours of the Western Church: a Canonical Hour of the Divine Office, appointed for the first hour of the day (beginning originally at 6 A. M., but sometimes at sunrise); = *prima-song* (see 11); also, the hour or time of this office.

Prime is one of the *three parcels* or 'Little Hours' (*primes, tierce, none*), and *completes* as distinguished from the 'Greater Hours'. Usually said or sung, and so said to be of Benedictine origin. Used, the others, likewise, according to Cassian (*circa* 420), added to the Ambrosian by the monastery of Bobbio (*circa* 700).

Etymologically and historically in Latin the sense 'first hour of the day' is earlier than the ecclesiastical one; but, in English, as in French, *prime* was long considered as the special name of the office, and came only secondarily to be applied name of the office, and came only secondarily to be applied to the time.

3. In Great Britain (in early use, *prime minister of state*): A descriptive designation, which has gradually grown to be the official title of the First Minister of State or leader of the administration.

Originally merely descriptive and modified as in the early 18th c. (quot. 1720) by prior application to other persons; it was the sole minister of a despotic ruler; others were quasi-, virtual applied approximately to Walpole, and discussed by him, as later by Lord North. Little used in later part of 18th c., *premier* being often substituted, also *first minister*; became usual by the middle of the 19th c., and began to come into official use from 1878. In 1902 fully recognized, and the precedence of the Prime Minister defined by King Edward VII. For fuller history, see A. F. Robbins in *N. & Q.* 8th s. b. Also the official designation of the leader of the administration in some of the self-governing British colonies and 'dominions beyond the sea'.

The usual title of the chief of the ministry in the colonies is Premier; but in Canada and in Australia this is assigned in most cases for the chief minister of each constituent colony, while *prime minister* is used for the first minister of the whole Dominion and of the Commonwealth; it is also the title in the Dominion of New Zealand, and in the colonies of Tasmania and Natal.

1. A name for prayer-books or devotional manuals for the use of the laity, used in England before, and for some time after, the Reformation.

The mediæval *Primer-text* or *Primer* was mainly a copy, or its English a translation, of different parts of the Breviary and Manual. For its origin and structure, see the Introduction to 'the Prymer or Lay Folks' Prayer Book' edited by H. Littlehales, E.E.T.S. 1895-7. In the 14th and 15th centuries, in its simplest form, it contained the Horary of the Blessed Virgin, the 7 Penitential and 15 Gradual Psalms, the Litany, the Office for the Dead (Placebo and Dirige), and the Commendations; to which however earlier additions were often made. In the early 16th c., the printed editions of this in English (examples known from 1527) are often called on the colophon *Prymer*, and in the colophon, *Horæ Beate Marie*, or the like. The name was also given to 1615 c. 12 books similar in character and purpose, partly based upon the *Sarum Horæ*, whether just cited by private persons (e.g. Blaythwayt's Primer, 1534) or with some sort of authority (e.g. Sir Henry's Primer, 1535), or by royal authority, as the King's Primer of 1545 and the successive recensions issued in the reigns of Hen. VIII, Edw. VI, and Elizabeth; also in 'the Uniform and Catholyke Prymer in Latin and English', appointed for general use by Queen Mary's Letters Patent in 1553. The title was also used for several English or Latin and English editions of *Horæ* according to the Roman use, published in 1599 and later.

After the Reformation, Primer was also applied to books to which the offices for daily prayers were based upon the orders contained in the Book of Common Prayer. These are described in the Preface to William Seres, the printer of the first of them in 1559 (see quot.) as 'books of private prayers, called and usually taken and reputed for Primers...set forth agreeable and according to the Book of common prayers'. Later forms of this, under the title 'The Primer or Catechism set forth agreeable to the Book of Common Prayer', were issued under Chas. II, Jas. II, Geo. II, and Geo. III, the latest app. to 1783.

2. An elementary school-book for teaching children to read; formerly, 'a little book, which children are first taught to read and to pray by' (Phillips 1706); 'a small prayer-book in which children are taught to read' (Johnson 1755-74).

This sense gradually disengaged itself from the preceding, from which in early use it cannot be separated. The books included under sense 1 appear to have been also used in teaching to read and as first reading-books; and those may have been from early times framed or chosen specially intended for this purpose; such was perhaps the primer of 1535. In the 16th c., printed books of this kind became common; that mentioned in 1618, c 1535 has a section containing the A. B. C., followed by the Pater Noster, Ave Maria, Creed, Blessings, Graces before and after meat, and private prayers. Examinations of Marshall's and Hilsey's Primers (1535, also begun with the A. B. C. English) are contained in the Primer of 1545 and the successive recensions issued in the reigns of Hen. VIII, Edw. VI, and Elizabeth; also in 'the Uniform and Catholyke Prymer in Latin and English', appointed for general use by Queen Mary's Letters Patent in 1553. The title was also used for several English or Latin and English editions of *Horæ* according to the Roman use, published in 1599 and later.

3. An elementary school-book for teaching children to read; formerly, 'a little book, which children are first taught to read and to pray by' (Phillips 1706); 'a small prayer-book in which children are taught to read' (Johnson 1755-74).

This sense gradually disengaged itself from the preceding, from which in early use it cannot be separated. The books included under sense 1 appear to have been also used in teaching to read and as first reading-books; and those may have been from early times framed or chosen specially intended for this purpose; such was perhaps the primer of 1535. In the 16th c., printed books of this kind became common; that mentioned in 1618, c 1535 has a section containing the A. B. C., followed by the Pater Noster, Ave Maria, Creed, Blessings, Graces before and after meat, and private prayers. Examinations of Marshall's and Hilsey's Primers (1535, also begun with the A. B. C. English) are contained in the Primer of 1545 and the successive recensions issued in the reigns of Hen. VIII, Edw. VI, and Elizabeth; also in 'the Uniform and Catholyke Prymer in Latin and English', appointed for general use by Queen Mary's Letters Patent in 1553. The title was also used for several English or Latin and English editions of *Horæ* according to the Roman use, published in 1599 and later.

After the Reformation, Primer was also applied to books to which the offices for daily prayers were based upon the orders contained in the Book of Common Prayer. These are described in the Preface to William Seres, the printer of the first of them in 1559 (see quot.) as 'books of private prayers, called and usually taken and reputed for Primers...set forth agreeable and according to the Book of common prayers'. Later forms of this, under the title 'The Primer or Catechism set forth agreeable to the Book of Common Prayer', were issued under Chas. II, Jas. II, Geo. II, and Geo. III, the latest app. to 1783.

Appears too early to be connected with PRIM *a.* The first element has been conjectured to be *F. primer*, L. *primu-s* first, and the second short for *F. printemps* spring; but for this there is no contemporary evidence, nor is the sense probable. (The statement in PRYNNE'S *Fyp. Mastrix of Plusch* that *prim-print* was orig. the primrose, and that the name was transferred from the herb to the shrub, is erroneous, and arises from the fact that *Agrostemma*, in Wyer the genus, has been supposed by some to be in Virgil and Ovid the name of some white-flowered herb.)

6. A male member of a royal family; *esp.* in Great Britain, a son or grandson of a king or queen. Also called *prince of the blood* (*royal*) (Blood *sb.* 9). *Prince Consort*, the husband of a reigning female sovereign (also himself a prince).

In this sense originating in the title *Prince of Wales*, which, in the first instance, was simply a continuation of sense 5, as title of the deposed native Welsh princes; but being, from the reign of Edward III, consecutively conferred upon the eldest surviving son of the King or Queen of England, came to be accepted with that precedence. The Prince of Wales was at first the only 'prince' in England (see quot. 1377); but in the reign of James I 'prince' was extended to all the sons of the sovereign, and under Victoria to all the grandchildren, being children of sons (q.v.). After the example of England, the equivalent of 'prince' has been given, with some addition, to the heir-apparent to the throne in various countries, as *prince royal* in Denmark, Sweden, Denmark, and Japan, *prince impérial* in the French Empire of 1852-70, *Prince of Asturias* in Spain, *Prince of Piedmont* in Italy, etc. In most of these countries the title of prince is also given to male members of the reigning family. (This sense may have been partly influenced by Roman usage under the empire, in which the title *princeps juventutis* 'chief' or 'prince of the youth', which was bestowed by the Emperor upon the two grandsons of Augustus, was afterwards customarily conferred upon the probable successor to the throne on his first entry into public life.)

5. A spiritual being (good or evil) of a high order; *spec.* in *pl.*, in medieval angelology, one of the nine orders of angels (see Orders of, 3), which has been variously reckoned as the seventh, fifth, or fourth. III. Transferred uses, of uncertain origin.

By Nares and others derived from the typographical sense, 'from the exact regularity and truth of the set of printing, which was at first deemed almost miraculous'. But printing was not new in 1598, and in various respects this explanation seems doubtful, though Shakspere plays on the two senses of 'in print.' In *Two Gent.* II. i. 174, *A. J. C.* v. iv. 22, and the phrase may sometimes have been so taken; cf. spot, etc., and shot in sense 7. The use in reference to the ruff, 14/5, may yet prove to be the earliest, though not evidenced in the quots.

Misc. Privet has been suggested as be a corruption of **primet*, a word erroneously used in Price's *Names of Plants* to occur in the *Greek Herbal* as a name of the primrose; no such word occurs there. Another suggestion is that *primetry*, *primet*, are the same as *privacies*, *privy*, and applied to the shrub from its use as enclosing hedges to one of a private part of a garden, to conceal dung-heaps, etc.; but of this there is no evidence. *Primet* or *Primelt* occurs more than once as a place-name in Hampshire, and the name *Primrose Banks*, app. in that county, is found by 1614 (O.E. Chron.). But no connection of this with the shrub is known. *Primet* also occurs in a 1781 p. deed, where it is doubtful whether it is a proper name: 1456 *Feet of Fines, Oxford Trin.* R. O. A. 8633, In crastino Sancti Hilarii apud Gretyngton ad villam de Farlingtone [Farrington, Hants], Isabella uxor...primet...per nonpotestatem ejus in presencia et Cecilia uxor Reginaldi le Long, que est tercia pars...tercia. If we had other evidence of the name of the shrub in ME., it would be tempting to render this 'consent of privet' as is done in Cath. Anc. *Deeds* 1901, IV. 2082.]

Pro-, *prefix*[1] The Latin adv. and prep. (see above), used in combination with verbs and their derivatives, and sometimes with other words not of verbal derivation.

(Unlike the Gr. προ-, the L. was originally and usually *prō-*; but in some compounds it was occasionally and in others usually or always shortened to *pro-*.)

A large number of Latin words so formed were retained in popular use in French (as in the other Romance langs.); many others were taken into French in earlier or later times as learned words, and were thence taken into English. In later times words of this kind have been adopted or adapted in English directly from Latin, or have been formed immediately from Latin elements.

In OF. the prefix had often the popular form *pur-, pur-, pour-* (see Purvey, Purloin), but this in many words was subsequently changed back to the Latin form *pro-*.

I. As an etymological element. The following are the principal uses in Latin and English. (All words of this class appear as Main words.)

1. a. Forward, to or towards the front, from a position in the rear, back, out, into a public position; as *prōcēdere* to call out, Proclaim, *prōdūcere* to lead forth, Produce, *prōicere* to cast forth (Projection), *prōlātare* to throw forth, Prolate, *prōmittere* to put out (Promissory), *prōnūntiāre* to speak out, Pronounce, *prōpāgāre* to put forth, Propagate, *prōrumpere* to thrust forth, Prorupt.

b. To the front of, down before the face of, forward and down; as *prōiicere* to fall forward or down (Projection), *prōlābī* slipping downward, Prolapse, *prōmulgāre* to trample down, Promulgate, *prōnunciāre* to fall down forwards (Pronunciation), *prōpēllere* to clash down (Propulsion), *prōsilīre, prōsiluīre* to skip down forwards (Prosaic), *prōtervus, prōtervīre* to stare or lay the face before one, to Patronize.

c. Forth from its place, away; as *prōdūcere* to give away, betray (Traducent), *prōfugere* to flee away, dissipate (Profligate), *prōpellere* to fire away (Propulsion).

d. Forward, onward, in a course or in time; as *prōdūcere* to Produce, *prōficīscī* Proceed, *prōvehī* to drive on, *prōgredī* to step forward, Progress, *prōmināre* to drive onward (Promontory), *prōmittere, prōmōtī* to move onward, Promote, Promise, *propellere* to drive forward, Propel.

e. Out, with outward extension; as *prōdūcere* slide to be drawn out, Production, *prōlāmā* Prolate, *prōlīgāre* to plant out, Propagate, *prōtrahere, protrūdere* to drag out, Protract.

f. Before in place, in front of; as *prōdūcere* to build in front, hold back, Produce, *prōcurāre* to order in front, Procure, *prōfugere* to cower in flight, Profligate.

g. Before in time, in anticipation of, in provision for; as *prōdīgium* Prodigy, *prōlīgāre* to speak before (Prolocutor), *prōvidēre* to foresee, Provide.

h. For, in preparation for, on behalf of; as *prōcūrāre* care for, Procure, *prōvidēre* to take care for, Provide, *prōspērus* wished for, Prosperous, *prōfitēri* to declare to, Profess.

i. With noun-done or obscure form; as *prōcūrus* tall, Procerous, *prōlīxus* Prolate, *prōbundus* deep, Profound, *prōtervus* abusing (Protervity), *prōnurus* to dismiss, Pronounce, *prōximus* nearest, Proximate, *prōtervus* Protervous, *prōvincia* Province.

2. Frequently prefixed in Latin to names of relationship, answering to Eng. 'great' or 'grand', F. *grand* and *petit*; as *aviā* grandfather, *prō-avus* great-grandfather, *amita* aunt, father's sister, *prō-amita* great-aunt, grandfather's sister, *gener* son-in-law, *prōgener* grandson-in-law, granddaughter's husband. So *prōnepōs* great-grandson, great-nephew, Prowessen, Prepost, *prōnepōtis* great-grandchild, great-niece, Prodigal, Parasit.

B. Pro- for Pre-, Per-. In late and mediæval Lat. *pro-* was sometimes substituted for *præ-, per-*, partly through confusion of sense, partly perhaps under the influence of words from Greek, such as *prōlogus, prōphēta*, Procanation. Examples of this are frequent in ML., where, however, as in med.L. MSS., it is often difficult to say whether *pro-* was intended, or was merely a scribal or copyist's error, due to confusion of the written *e* and *o*. Examples will be found among the cross-references.

II. As a living prefix.

4. In Latin *prō-* in the sense 'for', 'instead of', 'in place of', was prefixed to a sb., esp. originally in prepositional construction, as *prō cōnsule* (one acting) for a consul, afterwards combined with the sb., as *prōcōnsul* = deputy-consul; so *prōlēctor, prōlīctor, prōpāstor, prōpōlus, prōpraetor, prōquaestor, prōrēctor, prōspōlus*, etc.; also in a few names of things, as *prōlētrum* Prodigy, *prōtūtēla* deputy-guardianship.

English has examples of *pro-* prefixed **a.** to names of persons (officials or functionaries), 'acting as deputy'; as *pro-Grand Master, pro-gustation, pro-legate, pro-provincial, pro-provost, pro-regent, pro-synodal, pro-tabarack, pro-treasurer, pro-tribune, pro-warden*, etc.; also Pro-consul, Proractor, Proractor, etc. **b.** to names of things, as *pro-rectitude* (something serving the purpose of a reality), *pro-shrine, pro-sword* [after *pro-consul*], etc.; also Pro-cathedral, Pro-log, etc. **c.** to an adj., as *pro-ethical*, serving as a substitute for what is ethical: *pro-ne* **betantive** (see quot.): hence *pro-substantively* adv.

1892 H. Spencer *Princ. Ethics* I. ii. § 4 129, 392 We must class them as forming a body of thought and feeling which may be called 'proethical'; and which, with the name of sanction, stands in place of the ethical property so called. 1901 R. 3. In sense 'for, in favour of, on the side of'.

This use is entirely modern, and has no precedent or analogy in Latin. It appears to have arisen from the use of *pro* in Pro. 2, 3, or in Pro and con. 'As a certain manner, combinations with *pro-* take the place of those with *Franco-*, as *plain-Turk, plain-publican*. They appear to have begun c 1815, but to have been comparatively rare up to 1856, since which date they have swarmed in the journalistic press, usually in antithesis to formations in anti- expressed or understood. *Pro-Boer* and *anti-British* were terms of opprobrium during the South African War, 1899-1902.

a. Prefixed to a sb., sb. phr., or adj., forming adjs. with sense 'favouring or siding with (what is indicated by the second element)'; as *pro-slave, -American, -annexation, -Asiatic, -Boer, -British, -Catholic, -Chinese, -clerical, -educational, -English, -foreign, -French, -Irish, -Japanese, -moral, -negro, -opium, -papist, -patronage, -papery, -rebel, -Russian, -slavery, -tariff reform, -transubstantiation, -Turk, -Turkish, -war*, etc. Where the form of the second element permits, as in *pro-Boer, pro-Catholic, pro-negro, pro-papist, pro-Turk*, these are also used as sbs. = 'one who is on the side of, or favours . . ., a partisan or adherent of . . .'. **b.** In comb. with a sb. (or verb-stem) + -ER or -ING, forming a noun-sb. = 'one who favours or sides with . . .'; as *pro-Boerism* (one in favour of a School Board), *-brancher* (a partisan of branches), *-flogger* (one who favours flogging), *-slaver* (a pro-slavery man); *pro-liquorite* (one in favour of the unrestricted sale of alcoholic drinks). **c.** In comb. with a sb. or adj. (or directly from those in **a.**) + -ISM, forming abstract sbs. = 'the principle or character of being in favour of . . .'; as *pro-alcoholism, -Boerism, -capitalism, -clericalism, -Russianism, Semitism, -slaverpism*. Many of these are of opprobrious or hostile use.

Pro- (*prō*), *prefix*, repr. the Gr. preposition πρό, meaning 'before' (of time, position, preference, priority, etc.), forming in Greek many compounds—verbs, substantives, and adjectives. Of the sbs. and their derivatives more than 60 were adopted in late Latin as technical terms of rhetoric, philosophy, natural history, art, and Jewish or Christian religion (e.g. *problēma, prothesis, prodromus, prolepsis, prologus, prophēta* (*prophētēs, prophētissa, prophētidus*), *propatia, praxiarchus, procylon, propaedia*). With the revival of learning many more Greek terms were latinized. Many of these latinized forms of both periods have been adopted or adapted in the modern languages generally, and have subsequently served as models for the formation of new combinations from Greek (less commonly from Latin) elements, in the nomenclature of modern science and philosophy. The older and more important of the English words so derived appear in their alphabetical order as Main words. Those in which *pro-* is more obviously a prefix to a word itself used in English, or which are merely technical terms, follow here.

1. In sense 'Before in time': forming (*a*) sbs., chiefly scientific terms denominating the earlier, or (supposed) primitive type of an animal, plant, organ, or structure (with derived adjs.); (*b*) adjs. meaning 'previous to or preceding that which is expressed by the second element'.

A Malay boat propelled by sails or by oars; *spec.* a sailing boat of a particular type used in the Malay Archipelago.

It is about thirty feet long, has both stem and stern sharp, adapting it to sail equally well in either direction; one side is curved as in other vessels, the other is flat and straight and acts as a lee-board; to steady the boat a small canoe or the like is rigged parallel to it in the manner of an outrigger (see Dittmann *sb.*).

b. In modern use, as at Oxford and Cambridge, each of two officers appointed annually to discharge various functions in connexion with the meetings of the University and its various Boards, the examinations and conferment of degrees, and the like; they are also charged with the discipline of all persons *in statu pupillari*, and the summary punishment of minor offences.

In the old English Universities, they were formerly called *Rectores* and *Scholares Procter* respectively (see PROCTOR 3); they are now distinguished as *Senior* and *Junior Proctor*, in accordance with their university seniority. They are appointed or elected by the various colleges in rotation. At Oxford they are the representatives of the body of Masters of Arts, and, as such, are nominees of the Chancellor or Vice-Chancellor; they are officio members of the Hebdomadal Council and of almost all University Boards and Delegacies; they exercise a joint veto upon the proceedings and decrees of Congregation and Convocation, and appear for degrees in the Ancient House of Convocation; nominate delegates not otherwise specially appointed, supervise the examiners and examinations conjointly with the Vice-Chancellor, and concur with him in the conferring of all degrees. At Cambridge their powers and functions are similar, but less extensive. Proctors also exist with certain functions at Dublin and at Durham.

Proctors' days or *holidays* (*Oxf. slang*), the seven consecutive days accompany the proctors in their nightly perambulations of the streets for the purpose of preventing disorder.

An Paris and Cambridge, and prob. also originally at Oxford, they were called indifferently procuratores (procurers) and regentes. In Scotland all these elements of mediæval organization are still salient and active. 1890 *Daily News* 16 Nov. 3/3 The students at Aberdeen do not give a direct vote for the Rectorial candidates. They vote for a student who represents them, called the Procurator. After the recording of the votes, the 'Procurators' meet in another room, and the successful candidate is he who has a majority of Nations. If the Nations are equally divided the answer is he who has the numerical majority of votes.

II. 4. A public teacher or instructor of the highest rank in a specific faculty or branch of learning; *spec.* one who holds an endowed or established 'chair' in a university or one of its colleges. Also frequently applied to the tutors or lecturers on the staff of theological and other professional or technical colleges, academies, and seminaries.

In the mediæval European Universities, at first simply a synonym of *Magister* or *Doctor* (degrees being originally qualifications to teach); but in this use not common as an English word. The right originally possessed by every Master or Doctor to teach publicly in the schools of his Faculty was gradually exercised to an inner circle of teachers, and the term *Professor* came eventually to be confined to the holders of salaried or endowed teaching offices, or to the highest class of them, such appellations as *Reader*, *Lecturer*, *Instructor*, being given to teachers of lower rank. In the old English Universities the ancient usage survives in the letters S.T.P. (*Sacræ Theologiæ Professor*) for D.D.; the modern use is largely due to the creation of five *Regius-or King's Professors* by Henry VIII (a number in recent times increased to seven). The endowed teachers of some other subjects were at first called *praelectors*, but this has gradually been superseded by *professor*. See Rashdall *Univ. Europe Mid. Ages* I. 21, 292.

Profound (*prŏfau·nd*), *a.* (*sb.*) Also *6–7* **profund-e**. [a. OF. *profund*, *profund* (c 1175 in 181

Godef. *Compl.*, *parfund* 11th c. in Hatz.-Darm.), adj. L. *profund-us* deep, high, vast, obscure, profound (also *profundus* sb.), f. *pro*, Pre-[1] + *fundus* bottom. The *o* of Eng. is as in *abound*, *found* vb., *round*. The *fo*-form *profund* was chiefly a conformation to L., but partly a Fr. phonetic variant.

In Latin *profundus*, the physical sense was the original, the intellectual and moral sense being transf., but in Eng. the literal sense was already expressed by *deep*, so that *profound* with its freely use first used in a transferred sense, and only later in the literal sense, either to vocab. terms, and only those in the literal sense, either to vocab. Friends or Latin, or as a more learned and impressive word than *deep*. But it is convenient here to follow the original sense-development.

1. Deep (as a physical or material quality). **a.** Having great or considerable downward (or inward) measurement; of great depth.

b. The representation of an object in a picture in such a way as to make it appear to stand out in relief.

IV. 6. *Geom.* The drawing of straight lines or 'rays' according to some particular method through every point of a given figure, usually so as to fall upon or intersect a surface and produce upon it a new figure each point of which corresponds to a point of the original figure. Hence, each of such rays, or of such points of the resulting figure, is said to be the *projection* of a point of the original one; or the whole resulting figure is said to be the *projection* of the original.

In *central projection* (often called simply *projection*), the rays are all drawn from one point or 'centre' in *axial projection*, a number of planes are similarly drawn from one line or 'axis'.

fig. 1689 J. Taylor *Anthon.* 2. 30 Metaphysical projections of the moral system, have made uneven and crooked, and plausible they may seem.

7. The drawing according to scale, and on mathematical principles, of a plan, chart, or map of a surface, or a diagram on the flat of a machine or the like; *spec.* the representation of any spherical surface on the flat, e.g. of the whole or any part of the surface of the earth, more fully called *map-projection* (see b).

1597 Bacon *Wisdom* 81 b, It serueth as many waies, in building: in projection of plattes, for measuring of ground, dyalles, or mines. 1652–62 Pulverer *Stat. Philo.* II. 87 In the construction of maps...by the projection of the spherical surface on a plane, such as it would be were the eye supposed to be placed in a particular point; or by the developement, that is, the spreading out of a spherical on a plane surface. 1893 W. Bacon Allen *Treas. Math. Physics* 8, 1 (1896) 19 The difference between perspective drawing, or stereographic projection and orthographic projection. 1869 Thomas *Metal Work* 1, 3/2 Take two drawings—projections, as they are called—of the features of a man; the one as it is seen by the right eye, the other as it is seen by the left. 1887 D. K. Lee *Machine Drawn.* (1891) 103 Whilst the notion of projections had been imparted, projection lines being drawn, yet the student had utterly failed to realise from the sketches the form of the object he was drawing.

b. *Cartography.* A representation on a plane surface, on any system, geometrical or other, of the whole or any part of the surface of the earth, or of the celestial sphere; any one of the many modes in which this is done.

The earlier modes were actually the result of geometrical projection; but the name has been extended to representations which by quite outside the etymological sense.

The projections (in this extended sense) that have been used to represent the whole, the half, or parts of the earth's surface, are more than thirty; they have been classified by Major C. F. Close (*Sketch of Map Projections*, 1901, *Text-Bk. of Topogr.* & *Geogr. Surveying*, 1909, 62) under the following heads: 1. Orthographic (conform, or conformal), preserving the *forms* of areas (but not their relative sizes); 11. *Equal areas* (equivalent, or authalic), in which equal areas of the surface are represented by equal areas on the map, but the forms of these, when large, are distorted; III. *Perspective*, representing the surface as seen from some point of view at the centre, on the surface, or at various distances from it; IV. Zenithal (§§ 6, 7); V. Conical (§§ 8, 9); VI. Cylindrical (§§ 10–13); VII. *Conventional*, produced by arbitrary rules for convenience of drawing and the approximate representation of a number of properties; such is the *globular*, commonly used to adjust maps of the two hemispheres. Of the varieties in actual use, many belong to two, and some to three of these classes; thus *Mercator's projection* is orthographic and cylindrical. For *gnomonic*, *stereographic*, *orthographic*, *polyconic*, *zenithal*, *stereographic*, etc. *projections*, see these adjs. Many projections are also named after their inventors, as *Mercator's*, *Ptolemy's* (modified conical equal-area), *Sanson-Flamsteed's* (sinusoidal equal-area), *Airy's Balloon* (of stereo), *Cassini's* (rectangular cylindrical) used in the 1:25 inch Ordnance Maps of England, and 1:2500 of Great Britain, the six different projections of *Lambert*, etc. For those see the works cited above, and other special treatises.

This kinds of projection, though more unusual,...comes not to special use in describing the parts of the Earth near the Pole. 1789 Steuart *Mariner's Pract.* II. viii. 72 Charts, according to Mercator's or Wright's Projection. 1794 J. Ellicott *Lect. Tricks.* I. *Projection of the Sphere in Plane*, is a new Geometrical Delineation of the Circles of the Sphere, or any assigned Parts of them, upon the Plane of some one Circle; as in the Horizon, Meridian, Equator, Tropicks, etc. *Ibid.*, *Polar Projection*, is a Representation of the Earth, or of the Heavens, projected on the Plane of one of the Polar Circles. 1796 Pinkus tr. Kovacz's C. v., Astrolabes, Quadrants, Sun-dials, Maps, &c., are Projections of the Sphere; which are of three sorts, viz. Gnomonick, Orthographick and Stereographick. 1798 Hutton *Amer. Geogr.* I. 56 General maps...are projected upon the plane of some great circle...and from this circle the parallels is said to be rectilineal, equiangular, or horizontal. 1866 Preston *Navigation. Notes* 22 *Note*, The term projection has come to be applied to mapping by any mode of representation founded on some certain geometrical principle. 1867 Downes *Solom. midland Math.* 13 In Mercator's projection, which is a favourite one for maps, the globe is supposed to be stretched out on the inside of a cylinder which touches it all round the equator, and the cylinder is then cut and opened out flat or 'developed'. 1905 C. F. Close *Topogr.* & *Geogr. Surveying* xl. 91 The term *projection*, though sanctioned by long usage, is an unfortunate one. The great majority of useful map projections are not obtained in any geometrical way. A map projection is to be treated as the representation on a plane, by any law, of the terrestrial meridians and parallels.

c. *Cryst.* The projection of a point in each face of a crystal upon an imaginary containing sphere, called the *sphere of projection*.

From the centre of the sphere a line is drawn perpendicular to each face of the crystal; that is, each of these lines corresponds to a point on the sphere; a plane map of the sphere showing all these points is called a *projection of the crystal*.

1868 Greg & Lettsom *Mineralogy* 32 The diameter of the sphere of projection which is at right angles to the zone plane is called the zone axis. 1892 Ryan-Maskelyne *Crystallography* 8, 17 On the sphere of projection, and the principles of its stereographic representation. *Ibid.*, 18 Fig. 2 represents a stereographic projection of the faces and the plane of the cube, considerable. *Ibid.*, 19 The *plane of projection* then bounded by a great circle of the sphere is represented by the plane of the paper on which the circle is drawn, which latter will be termed the *circle of projection* or primitive circle.

1685 LEYBOURNE *Cromaan's Progr. Geom.* 30 Projective Geometry, dealing with projective properties (i.e. such as are not altered by projection), is chiefly concerned with descriptive properties of figures...Since the magnitude of a geometric figure is altered by projection, parallel properties are as a rule not projective. Pronoun (*prəʊnaʊn*). [f. PRO-[1] + + NOUN, after F. *pronom*, L. *pronōmen*.] One of the Parts of Speech: a word used instead of a noun substantive, to designate an object without naming it, when that which is referred to is known from context or usage, has been already mentioned or indicated, or, being unknown, is the subject or object of inquiry.

Personal pronouns of the first and second persons (*I, thou, we, you, you*), with their cases used instead of the names of the speaker and the person spoken to. Those of the third person (*he, she, it, they*, with their cases, originally demonstratives) avoid the repetition of a noun already mentioned or indicated. Interrogative pronouns (*who? what?* added *which?*) ask the question of a person or thing unknown. Relative pronouns (*who, which, that*) combine the function of a personal or demonstrative pronoun with that of a conjunction, and subordinate one sentence or clause to another, as 'I met a friend who told me' for 'I met a friend, and he told me'. Possessive pronouns are adjectives arising out of the original genitive case of personal pronouns. In Eng., as in many other modern langs., they have developed two forms, one attributive or strictly pronominal (*mine, thine, ours, yours*, etc.), the other adjectival (*my, thy, our, your*, etc.).

In addition to these, several definitive adjectives are very commonly used absolutely or pronominally, and classed as *adjective pronouns* or *pronominal adjectives*. These include the DEMONSTRATIVES, *this, that, these, those*; *yon, yonder*; DISTRIBUTIVES, *each, every, either, neither* (of which *every* as a pronoun is now archaic); INDEFINITES *universals*, etc., *any, some, one, other* (another, *none*, to which some add *all, both, many, few, enough, such, same* used absolutely. *One* is often used as an indefinite personal pronoun (*One ate*) and the words *self* and *own*, used to strengthen the personal and possessive pronouns, are sometimes classed with them.

The cowrie backs of the shells were ground down, and the hollows thus made filled up flat with red sealing-wax. Four of the shells were shaken in the hand or in a box, and thrown after the manner of dice on a table, the stake being won or lost according to the number of white or red sides coming up. When two or four shells turned up alike, it was called a 'nick' and won; any other combination was an 'out' and lost. *Round props* were loaded shells used in cheating. HELEN H.
